technical catalogue

FLAMANT

YOU'RE HOME

New seasons bring new moods.

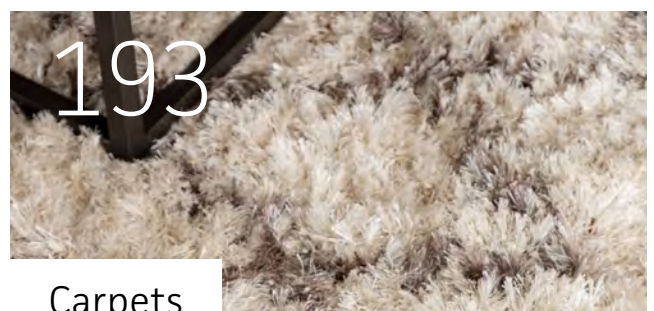

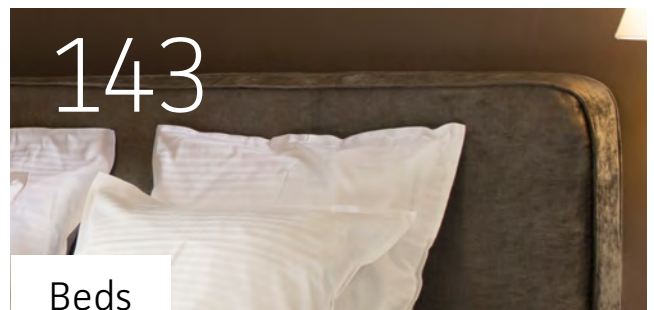

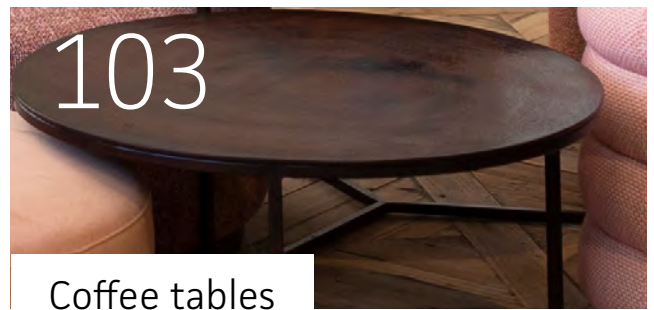

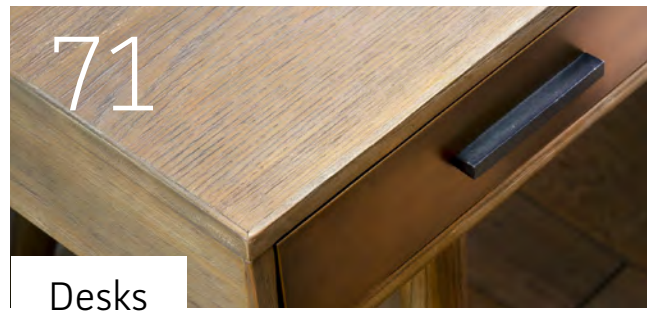

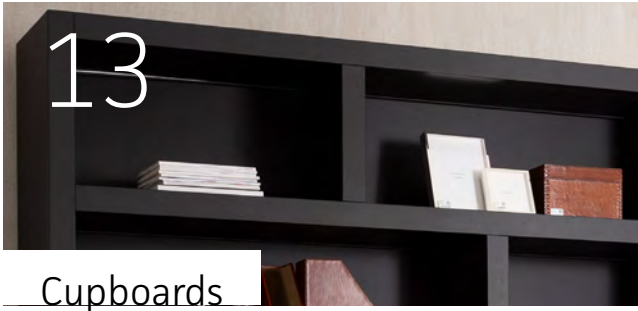

Flamant meets spring & summer with a new collection, bringing colour and craft into every home. We hope to inspire you with this new edition of our signature B2B catalogue.

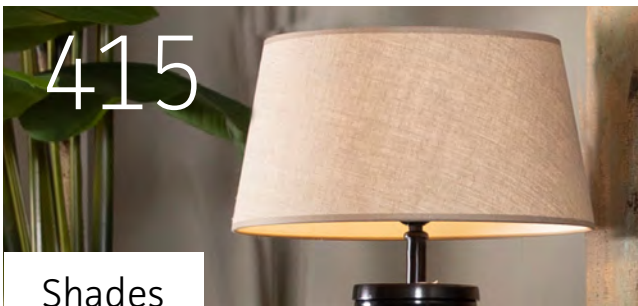

This catalogue provides all the technical information about our Flamant range. Looking for more information about a specific product? Your sales representative will be more than happy to help. You will find all contact details at the end of this catalogue.

In love with one of our items? Visit our online shop and order it today. Simple, secure and fast. Log in to your account at www.flamant.com/flamant/partners and shop away.

Feel at home,
with a touch of Flamant

Table of contents

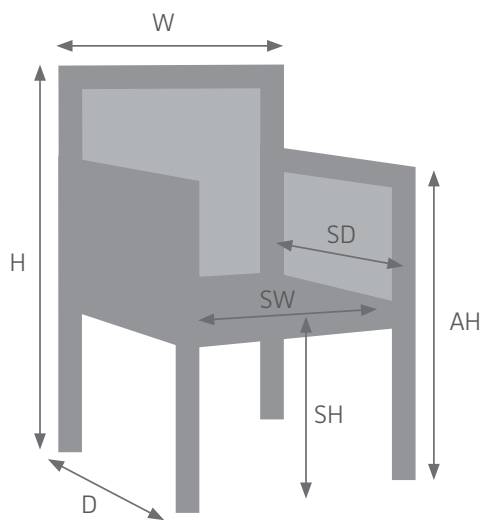

435 Index

447 Contact

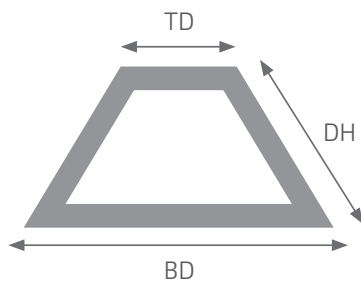

Definition of symbols

- » W = Width
- » D = Depth
- » H = Height
- » SW = Sit Width
- » SD = Sit Depth
- » SH = Sit Height
- » AH = Arm Height

- » H = Height of the table
- » HUT = The height of the underside of the table

- » BD = Bottom Diameter
- » TD = Top Diameter
- » DH = Diagonal Height

Available feet

- » P1 = Oak natural brut
- » P2 = Oak mahogany
- » P3 = Weathered oak
- » P4 = Oak mocha
- » P5 = Oak white

All Flamant fabrics

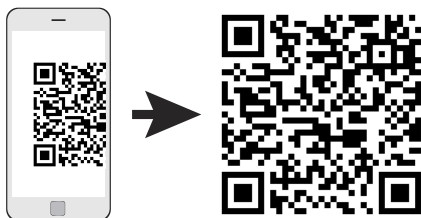

Examples of all the Flamant fabrics can be found at the end of the chapter 'benches and footstools'

Custom made items

Bespoke items are not covered by the right of withdrawal and are therefore not eligible to be returned, cancelled or exchanged.

QR-code

Scan the QR-codes for more information about a product

First, you need a QR-code app and a smartphone or tablet equipped with a camera. When you launch your app of choice, you'll see that your phone's camera is activated, with an on-screen framing guide. Line up the camera on your device with the QR code you want to scan, and hold the device steady until the app can read the code and redirects to the website with additional product information and images.

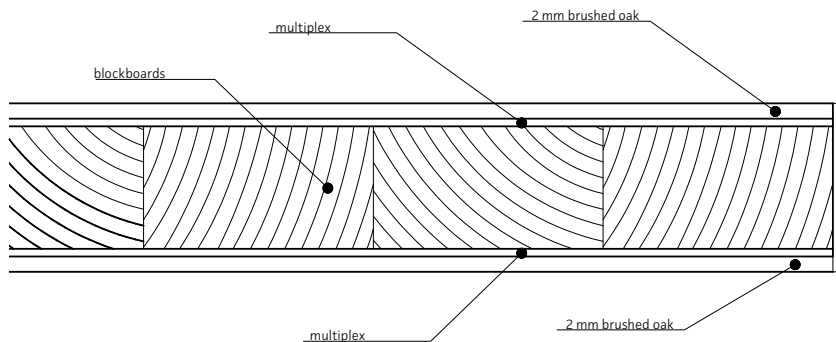

Recycled wood

- » Each article is different = each article is **UNIQUE** and **COLOR DIFFERENCES** may occur:
Cracks, knobs, color, age of wood, origin of wood,
- » No mass production, but it is the process of **ARTISANAL** manufacturing
- » Furniture pieces with lots of **CHARACTER**
- » **HAND MADE**. So, there might be variations in the result
- » Frequently with a **FINISH**, added in an artisanal way
- » **ECO-FRIENDLY** furniture

Solid wood

- » Each article is different = each article is **UNIQUE**
- » Cracks, knots and nerves are clearly visible
- » Furniture pieces with lots of **CHARACTER**
- » Furniture pieces with a **true SOUL**
- » Beautiful **IMPERFECTIONS**, due to the tree out of which this furniture piece is unique
- » The wood continues to live on.
- » Respect for the basic material : **WOOD**

Ply-wood veneer

- » The choice is based upon the design of the furniture piece
 - » **Straight lines**
 - » **Solid surfaces**
 - » **Contemporary look**
 - » Clean design
 - » **Moist-resistant**
-
- » Did you know that wood veneer is one of the **most eco-friendly wood products**? Wood is a naturally renewable resource. When trees are harvested to make wood products, virtually all parts of the tree are used, hence eliminating waste. Once the product has reached the end of its life cycle, it can be easily recycled. Using wood contributes dramatically to fewer greenhouse gases than concrete, steel, and similar materials, and wood outperforms other products over the complete life cycle of the product. However, that doesn't mean that all wood products are equally eco-friendly. For the most environmentally friendly wood solution, veneer is an excellent choice.
 - » Wood veneer is a wood product made using real wood. The wood is cut into thin layers and bonded to an underlayer. This process allows us to obtain **300 percent more wood from a single log**. By cutting the thin sheets to create the veneer, we maximize the yield from a log and significantly reduce the amount of wood required to create a product
 - » Solid wood and veneer both showcase the natural beauty of wood, but they have some fundamental differences beyond thickness. Solid wood expands and contracts with temperature changes and humidity. Over time, this can lead to cracking, warping, and damage. Solid wood products may become damaged more quickly, requiring replacement sooner, which uses up more resources. In contrast, **veneer involves bonding thin layers of wood to secure plywood or a similar backing, which is less prone to warping and cracking**. Equally important, these backings are made from lesser-quality trees that grow faster, putting less strain on resources.

- » This kind of stone is just polished and waxed, there is no special treatment to prevent marks. In case of stains: Apply clear water to soak the contaminated area, after stain is dissolved by water it can be cleaned with laundry detergent. After clean up, dry more than 10 hours and wax it properly.

www.flamant.com

Recognized Flamant professional customers can order online with their Flamant account.

Reproduction of the models, names or references, as well as the reproduction of the pictures of these models, are strictly forbidden. We have attempted to reproduce our models in this catalogue as faithful as possible. However, we cannot assume any responsibility for slight differences in colour, model, measures and construction, between the pictures in this catalogue and the actual articles, neither for incidental errors in the pictures and/or texts.
