Introducing LinenMe Fashion

Our clothes and homeware collection are carefully designed to be comfortable yet flattering, timeless yet stylish, versatile yet classic. Relaxed, drapey silhouettes crafted from pure linen, and perfectly proportioned garments will become your wardrobe staples. Each item in our clothes edit is made individually to order and can be personalized for a unique, bespoke finish. Charming details such as delicate buttons or hem finishes make each item extra special. Linen is perfect for travelling as it regulates body temperature and looks better with some charming crumples. But linen is not just for vacations: our clothes are made for the everyday. They are expertly cut to look effortlessly chic, and are made to outlast fast fashion fads. Think floaty tunics, breezy shirt dresses and unfussy trousers that will lift any outfit. Our versatile nightshirts, elegant robes, understatedly delightful pyjamas and fabulous djellabas are perfect for pottering about the house or cozying up for a delicious night's sleep. We carry a wide range of colors and sizes to make sure customers get exactly what they need.

Sizes: S, M, L, XL (other sizes upon request)

Sustainability

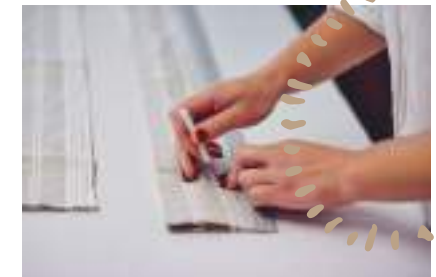

At LinenMe we work hard to be an environmentally friendly business: we use only green energy in our production process and we rework leftover fabric into linen tote bags. We don't believe in fast fashion, and we create textiles and homewares that are designed to look and feel amazing for years.

To further our commitment to sustainability, we are proud to launch our new LinenUs collection of homeware basics made from linen offcuts and unused scrap material. This range aims to further reduce our carbon footprint and achieve a zero-waste target for newly manufactured products. We are also offering our customers a complementary linen shopping bag if they choose plastic-free wrapping for their products.

Linen as a sustainable material

At LinenMe we are committed to ensuring our products are sustainably produced. Linen itself is an environmentally-friendly fabric as it requires fewer resources to grow and process, and is biodegradable. We use every last inch of fabric in our production process to minimise waste, and we craft products that are made to last, in keeping with our slow-living aesthetic.

Made-to-order production

We don't follow fashion fads – we design clothes that are classic and enduringly stylish, rather than pandering to the latest trend. We love fashion and are always creating new designs and researching the best silhouettes and cuts, but we won't produce anything that we know won't stand the test of time. Buy a linen dress from us now and it will look just as fabulous next summer, and the summer after it.

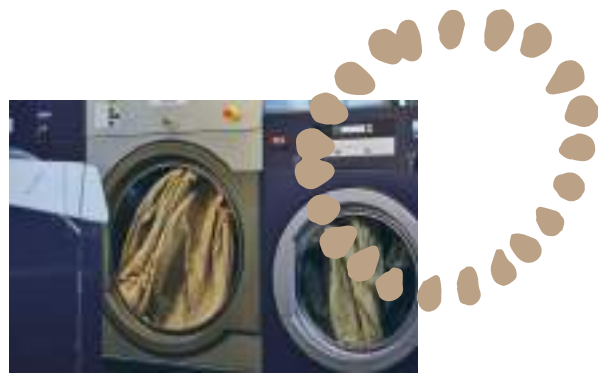

Zero waste

At LinenMe our philosophy is based on creating beautiful linen homewares with a minimal impact on the planet. By reusing offcuts of larger pieces of fabric we reduce waste, and we combine traditional hand looms with modern production techniques to work efficiently.

Certifications

At LinenMe we're a three-generation family business recognized for our great quality products and excellent designs. We hold three different certifications: European Flax ® trademark, Woolmark,OEKO-TEX. So you can be sure your product meets high standards and will have a long life.

Caring for your linen product

Proper care can ensure your linen product has a long, beautiful life. This not only saves you money, it also reduces waste and preserves resources.

Mindful shopping

There has been a gradual and welcome shift away from thoughtless consumption and towards living more consciously and with integrity. We want to surround ourselves and our families with quality products that will last a long time, and that are sustainably produced. We want to embrace slow living in whatever form is manageable for our lifestyles. And we want our homes to be organised, welcoming and uncluttered. None of this, of course, necessarily involves buying more stuff. But we also want to experience the luxurious comfort of new linen bedlinen, to replace tatty cushions with ones we can be proud to plump and to make little changes that nod to current trends and looks.

Packing

We use cardboard boxes and envelopes in our packaging – cardboard is a more sustainable material that's renewable, reusable and recyclable. Our courier bags are made from 80% recycled film. We pack your purchases in linen bags made from fabric remnants to reduce waste. These pretty bags come in different colours and can be reused in a variety of ways around your home.

Shipping

Our couriers – FedEx, UPS and DPD – are trying to be more sustainable by choosing optimal routes, investing in research into green initiatives, converting their fleets to electric vehicles and investing in, or using, renewable energy. You can make a difference too by accepting your package on the first delivery attempt or using pick-up points.

Beach Bags

Stripes

Our fabulous new range of linen beach towels will fly to the top of your holiday essentials list. Crafted from pure, highest quality linen these towels are super absorbent and quick to dry. They are lightweight and not much bigger than your beach book or magazine. They are also sand-resistant, meaning you don't end up with a bag full of beach at the end of your day. Large enough to drape over a sun lounger, elegant enough to wear as a sarong, our beach towels get better with age, softening with each use. Finished with plain seam. Fabric density from 280 g/m² to 300 g/m².
