Introducing LinenMe Fashion

Our clothes and homeware collection are carefully designed to be comfortable yet flattering, timeless yet stylish, versatile yet classic. Relaxed, drapey silhouettes crafted from pure linen, and perfectly proportioned garments will become your wardrobe staples. Each item in our clothes edit is made individually to order and can be personalized for a unique, bespoke finish. Charming details such as delicate buttons or hem finishes make each item extra special. Linen is perfect for travelling as it regulates body temperature and looks better with some charming crumples. But linen is not just for vacations: our clothes are made for the everyday. They are expertly cut to look effortlessly chic, and are made to outlast fast fashion fads. Think floaty tunics, breezy shirt dresses and unfussy trousers that will lift any outfit. Our versatile nightshirts, elegant robes, understatedly delightful pyjamas and fabulous djellabas are perfect for pottering about the house or cozying up for a delicious night's sleep. We carry a wide range of colors and sizes to make sure customers get exactly what they need.

Sizes: S, M, L, XL (other sizes upon request)

Linen Us

At LinenMe we work hard to be an environmentally friendly business: we use only green energy in our production process and we rework leftover fabric into linen tote bags. We don't believe in fast fashion, and we create textiles and homewares that are designed to look and feel amazing for years.

To further our commitment to sustainability, we are proud to launch our new LinenUs collection of homeware basics made from linen offcuts and unused scrap material. This range aims to further reduce our carbon footprint and achieve a zero-waste target for newly manufactured products. We are also offering our customers a complementary linen shopping bag if they choose plastic-free wrapping for their products.

ZERO WASTE PRODUCTION

We use up very last piece of fabric, resulting in a zero-waste our production process. The new LinenUs range makes clever use of offcuts, scraps and remnants to create beautiful homewares with nothing left over.

USE ONLY GREEN ENERGY

Our production process is powered by solely renewable energy, purchased from green suppliers who care about the planet.

LINEN IS MORE SUSTAINABLE THAN COTTON

Choosing linen is already a great way to be more sustainable as it uses fewer resources to grow and process than cotton. It is also biodegradable, so once a product comes to the end of its use it won't contribute to landfill.
